3D DIGITAL DELIVERY at MNDOT

Greg Hruby| Project Data Management Section (PDMS) , CADD Supervisor

DEPARTMENT OF TRANSPORTATION

3D Digital Delivery : Status Fall 2019

- **Agency working in 3D CAD. Expanding use going forward.**

    - **Understand in-place data quality <u>required</u> to create design models that support bidding, construction, inspection, as-built.**

    - **Pending update of CAD software, CADD standards will improve ability to work in 3D and share/deliver data to others.**

    - **Current Plan Sets : Not Gone Yet.**

- **Use 3D design model (or exported info) as source for downstream work. Next steps/concerns:**

    - **Assess contract language, authorization & practices to support use**

    - **Pilot projects to determine best practices, data exchange-management**

    - **Getting constructive input/feedback from partners & industry**

- **<u>*NEW:*</u> AASHTO action on IFC Data Standards being tracked.**
